Description courte du produit

Sonitus Acoustics Leviter series are the first Sonitus Acoustics bright band absorber with a special velvet color coating (available in different colors).

Pack of 6 pieces

Description du produit

Sonitus Acoustics Leviter series are the first Sonitus Acoustics bright band absorber with a special velvet color coating (available in different colors).

It is made from our USAP* foam and a velvet layer that is applied directly to the foam. The special coating layer helps to boost the absorbing performance and absorption already begins at 100 Hz (Shape 12).

This panel is applicable in spaces where the emphasis is not only on the sound yet on aesthetics.
