## Description du produit

Custom print panel's construction is the same like Fiber panel`s. Robust MDF frame and mounting profiles included. The main difference is the cover.

We use a special full acoustic transparent fabric which can be printed. We just need your picture in good quality and we will do it for you.

It is also possible to combine more panels to get 1 big picture, we just need to know the space between the panels and quantity of panels. We suggest that the space between the panels is not more than 12cm.
